PHP code intelligence for Visual Studio Code

Disable   **Uninstall** ⌄   ⚙

This extension is enabled globally.

Details   **Feature Contributions**   **Changelog**

Intelephense

PHP code intelligence for Visual Studio Code.

Intelephense is a high performance PHP language server packed full of essential features for productive PHP development.

- Fast camel/underscore case **code completion (IntelliSense)** for document, workspace and built-in symbols and keywords with automatic addition of use declarations.
- Detailed **signature (parameter) help** for document, workspace and built-in constructors, methods, and functions.
- Rapid workspace wide **go to definition** support.
- Workspace wide **find all references**.
- Fast camel/underscore case **workspace symbol search**.
- Full **document symbol search** that also powers **breadcrumbs** and **outline** UI.
- Multiple **diagnostics** for open files via an error tolerant parser and powerful static analysis engine.
- Lossless PSR-12 compatible **document/range formatting**. Formats combined HTML/PHP/JS/CSS files to...
- Embedded **HTML/JS/CSS code intelligence**.

This extension is enabled globally.

Details Feature Contributions Changelog Runtime Status

Prettier Formatter for Visual Studio Code

Prettier is an opinionated code formatter. It enforces a consistent style by parsing your code and re-printing it with its own rules that take the maximum line length into account, wrapping code when necessary.

JavaScript · TypeScript · Flow · JSX · JSON
CSS · SCSS · Less
HTML · Vue · Angular
GraphQL · Markdown · YAML
Your favorite language?
